Connect your data to Zetaris Operational Healthcare Data Quality Dashboard

1. Navigate to the Analytics - Power BI Apps section in the App Source.
2. Find the template app that you want to use and click on it to open its details page.
3. On the template app details page, click on the "Get it now" or "Install" button to add the template app to your workspace.
4. Once the template app is installed, go to the workspace where it was installed.
5. In the workspace, locate the template app and click on it to open it.
6. The configuration page is named as 'connect your data' on the top of the page.
7. On the configuration page, enter the following information:
    IP address: Enter the allocated IP address provided to you by Zetaris.
8. After providing the required information, click on the "Connect" or "Next" button to establish the connection. Enter the below information:
    Email ID: Enter your Zetaris account email ID.
    Password: Enter your Zetaris account password.
9. The template app will attempt to connect to your data document using the provided information.
10. If the connection is successful, the template app will start loading and visualizing the data in Power BI.
11. You can then explore the template app's pre-built dashboards, reports, and visualizations to gain insights from your data.
